

Don't waste another day being tired. **Sleep tonight.**

Bristow Medical Center offers state-of-the-art sleep diagnostic and treatment technologies. We are proud to use and recommend the Auto-Titrating Respironics A-Flex machines.

A-Flex softens the pressure transition from inhalation to exhalation to provide additional comfort in an auto-CPAP mode. The pressure profile mirrors the patient's breathing, and with the auto algorithm intelligence, it will respond to the patient's therapeutic needs throughout the sleep session. The Auto-Titrating Respironics A-Flex machine is one of the most comfortable CPAP machines available.

Bristow Medical Center has combined luxury, convenience, the highest customer service and the latest technology to provide you the best night's sleep possible. Luxurious bedrooms are equipped with private baths and full-size beds. Each room is made comfortable with oscillating fans and cable TVs.
